The Study Materials Aimed to Help You Pass the Certification Exam

**Exam** : **E20-597**

**Title** : Specialist - Systems  
Administrator, NetWorker  
Exam

**Vendor** : EMC

**Version** : DEMO

**NO.1** What is the first step in the process for information protection using snapshots?

- A. Capture a logically consistent virtual view of data
- B. Application needs to be put into a quiesced state
- C. Ensure that all the writes are committed
- D. Release the application from quiesced state

**Answer:** B

**NO.2** Refer to the Exhibit.

	Sunday	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday
Level	Full	Incremental	Incremental	Synthetic Full	Incremental	Incremental	Synthetic Full
Size	1.5 TB	200 GB	150 GB		500 GB	100 GB	
Deleted		750 GB				200 GB	

What is the size of the EMC NetWorker synthetic full on Wednesday?

- A. 1.1 TB
- B. 0.75 TB
- C. 1.5 TB
- D. 1.85 TB

**Answer:** B

**NO.3** What is a characteristic of Dell EMC NetWorker recover operations for file system backups?

- A. Recovered files have the current data for the modification time and permissions are retained
- B. Recovered files retain the modification time and permissions
- C. Recovered files retain the permissions but the modification time is set to "default"
- D. Recovered files retain the modification time but the permissions are set to "default"

**Answer:** D

**NO.4** Which applications are supported by the EMC NetWorker Module for Microsoft (NMM) federated backup?

- A. SharePoint distributed farm and SQL AlwaysOn Availability Group
- B. Exchange Database Availability Group and SQL AlwaysOn Availability Group
- C. Both full and incremental backups of Sybase and Exchange Database Availability Group
- D. SharePoint distributed farm and Windows Hyper-V CSV

**Answer:** B

**NO.5** In an EMC NetWorker environment, which two ports will nsrexecd always try to listen on?

- A. 9301, 9302
- B. 8080, 8081
- C. 9000, 9001
- D. 7937, 7938

**Answer:** D

**NO.6** In which order are the steps performed when creating an EMC NetWorker application-based snapshot?

- A. 1. Freeze application2. Take snapshot3. Commit writes4. Thaw application
- B. 1. Flush buffers2. Freeze application3. Take snapshot4. Thaw application
- C. 1. Commit writes2. Freeze application3. Take snapshot4. Thaw application
- D. 1. Freeze application2. Flush buffers3. Take snapshot4. Thaw application

**Answer:** D

**NO.7** Why is the Dell EMC NetWorker server client parallelism value higher than any other client by default?

- A. Manage more devices simultaneously
- B. Assign the NetWorker server a higher priority
- C. Accommodate server CFI backups
- D. Increase the bootstrap backup performance

**Answer:** A

**NO.8** An EMC NetWorker backup job has failed 95% of the way through its operation. Which functionality is provided by the checkpoint restart feature?

- A. The backup can continue from the last known good point
- B. The backup can be merged with data from the last server checkpoint
- C. The backup can always continue exactly where it left off
- D. The backup must be restarted from the beginning

**Answer:** A

**NO.9** What is the correct sequence of events in a scheduled backup workflow using Dell EMC NetWorker Module for Databases and Applications (NMDA)?

#### Answer Area

savegrp program requests client side nsrexecd to run the savefs program and then sends information back to the savegrp program

nsrdasv contacts nsrd for authentication and then sends backup data to the NetWorker device

savegrp program contacts the nsrexecd service to start the nsrdasv program

Tracking information is recorded in the NetWorker media database and CFI

nsrd starts the configured group's backup by invoking the savegrp program

**STEP 1**

**STEP 2**

**STEP 3**

**STEP 4**

**STEP 5**

**Answer:**

savegrp program requests client side nsrexecd to run the savefs program and then sends information back to the savegrp program

nsrdasv contacts nsrd for authentication and then sends backup data to the NetWorker device

savegrp program contacts the nsrexecd service to start the nsrdasv program

Tracking information is recorded in the NetWorker media database and CFI

nsrd starts the configured group's backup by invoking the savegrp program

**Answer Area**

savegrp program contacts the nsrexecd service to start the nsrdasv program

savegrp program requests client side nsrexecd to run the savefs program and then sends information back to the savegrp program

nsrdasv contacts nsrd for authentication and then sends backup data to the NetWorker device

nsrd starts the configured group's backup by invoking the savegrp program

Tracking information is recorded in the NetWorker media database and CFI

**Explanation**

**Answer Area**

savegrp program requests client side nsrexecd to run the savefs program and then sends information back to the savegrp program

nsrdasv contacts nsrd for authentication and then sends backup data to the NetWorker device

savegrp program contacts the nsrexecd service to start the nsrdasv program

Tracking information is recorded in the NetWorker media database and CFI

nsrd starts the configured group's backup by invoking the savegrp program

savegrp program contacts the nsrexecd service to start the nsrdasv program

savegrp program requests client side nsrexecd to run the savefs program and then sends information back to the savegrp program

nsrdasv contacts nsrd for authentication and then sends backup data to the NetWorker device

nsrd starts the configured group's backup by invoking the savegrp program

Tracking information is recorded in the NetWorker media database and CFI

**NO.10** Which EMC NetWorker command lists save sets stored in a particular volume?

- A. nsrmm -j volume
- B. mminfo -q volume
- C. nsrretrieve volume
- D. nsrinfo volume

**Answer:** B

**NO.11** An EMC NetWorker storage node is connected to a Data Domain system with virtual tape library configured.

Which device type should be configured on NetWorker?

- A. AFTD
- B. Cloud
- C. Data Domain
- D. Tape

**Answer:** D

**NO.12** A company wants to install EMC NetWorker server software in their Microsoft Windows environment with SAN-attached disk and DAS. Where is the required software installed?

- A. Proxy host on the SAN
- B. Separate volume from the O/S
- C. C:\Program Files\Legato
- D. C:\Program Files (X)86

**Answer:** B

**NO.13** A backup administrator is configuring a clustered EMC NetWorker storage node. How are the devices within the cluster defined?

- A. Remote
- B. Virtual
- C. Local
- D. Dedicated

**Answer:** A

**NO.14** How is the Dell EMC NetWorker multi-tenancy facility option enabled?

- A. Configuring a tenant administrator in a restricted datazone
- B. Adding a license to increase the number of managed zones
- C. Configuring clients to a multi-tenant enabled Data Domain device
- D. Configuring a restricted datazone resource on a NetWorker server

**Answer:** C

**NO.15** Which type of computing and storage environments does EMC NetWorker protect?

- A. NAS, SAN, DAS, and WAN
- B. SAN, NAS, DNS, and LAN
- C. DAS, DNS, SAN, and WAN
- D. LAN, SAN, DAS, and NIS

**Answer:** A

**NO.16** Which EMC NetWorker process keeps the record of the TCP/IP port range that is used by EMC NetWorker processes?

- A. nsrexecd
- B. nsrd
- C. nsrports
- D. nsrpm

**Answer:** A

**NO.17** Which daemon is responsible for organizing backup data before it is written to the backup media?

- A. nsrlcpd
- B. nsrmmgd
- C. nsrmmd
- D. nsrjobd

**Answer:** C

**NO.18** Which feature of EMC NetWorker allows multiplexed, heterogeneous data to reside on the same tape?

- A. OTF
- B. ZIP
- C. TAR
- D. CPIO

**Answer:** A

**NO.19** An Administrator found a corruption on Resource Files on an EMC NetWorker Server. Which type of recovery should the administrator use?

- A. Disaster
- B. Direct
- C. Browsable
- D. Save Set

**Answer:** A

**NO.20** An EMC NetWorker group resource named "Full\_Backup" is configured with the probe-based group checkbox enabled. What describes probe-based backups?

- A. Probe Interval controls whether the group should be automatically restarted
- B. Backup is triggered by successful execution of a user-defined client probe
- C. Probe resources are assigned to the group
- D. Probe start and end times define the backup start and end period

**Answer:** B

**NO.21** What is the first step that occurs during a client initiated backup?

- A. nsr daemon sends information to EMC NetWorker server
- B. Save program connects to nsrmmd
- C. Save program generates one save stream of data
- D. Save program initiates a connection to nsrindexd

**Answer:** C

**NO.22** A backup administrator wants to exclude all user temp directories during backups. How can this be implemented using EMC NetWorker?

- A. Specify only the files to back up in the client save set attribute
- B. Create a backup\_exclusion file
- C. Exclude the files using a NetWorker directive
- D. Specify each file to exclude in the client resource

**Answer:** B

**NO.23** A backup administrator has configured a new library using the EMC NetWorker Management Console on an existing storage node. They notice that the library does not show ready in the NMC. Before running backups to the new library, the administrator wants to ensure the process that controls the library is running.

Which process should the administrator look for on the storage node?

- A. nsrexecd
- B. nsrsnmd
- C. nsrlcpd
- D. nsrmmd

**Answer:** C

**NO.24** What is an advantage of integrating Dell EMC NetWorker Snapshot Management with ProtectPoint?

- A. Backup of production data stored on third-party storage
- B. Minimal backup load on the application host and storage node
- C. Faster cloning process for disk devices
- D. Minimal backup load on the NetWorker server

**Answer:** C

**NO.25** An EMC NetWorker administrator configured a Microsoft Exchange client with the NetWorker Module for Microsoft (NMM). In which attribute did the administrator specify the backup options?

- A. Save set
- B. Schedule
- C. Backup command
- D. Application information

**Answer:** D
